

Delta-Drive, Brolly Anchors & Spring Toggles

Delta-Drive: Suitable for

Self drilling plasterboard fixing anchor. A one piece anchor that self drills into plasterboard, dry lined partition or aerated concrete. The point drills the hole, and the helical thread cuts into the board giving excellent locking properties to accept the fixing screw.

Application

Light weight items such as electrical boxes / light fittings, shelf brackets, mirrors, bathroom fittings etc. Comes complete with a 35mm, pan head self tapping screw.

Material & Sizes

High grade alloy.
One size Delta-drive to cover all applications.

Brolly Anchors: Suitable for

Plasterboard, Fibreboard.

Application

Fixing in cavity situations where fire proofing is required. Also screw and anchor can be removed if so desired.

Material & Sizes

Manufactured from bright zinc plated steel with collapsing legs to create the anchor hold. Anti rotation lugs fitted to the anchor head. Setting tool available.

M4x 22mm to M6 x 53mm.

Spring Toggles: Suitable for

Plasterboard, Fibreboard, Lath walls/ceilings.

Application

Fixing in cavity situations where a load spread over a large area is required.

Material & Sizes

Manufactured from bright zinc plated steel with spring activated toggle bar.

M3 x 50mm to M6 x 75mm.

Packaging for all

In neutral packaging, (own label showing company name, code and bar code can be added).
